“I had gone through this before. I can put myself in their shoes and offer time, comfort and support for new patients.”
Mr Anthony Boey, a patient volunteer who has provided comfort and emotional support to new patients for more than 2 years.

“Through NKF’s eye screening, I was informed that my right eye is affected by diabetes. I’m glad to find this out early so I can follow up with my hospital eye specialist for early intervention.”
Mr Teo Tin Teck, a patient who benefitted from the eye screening services.

“By choosing to do peritoneal dialysis (PD) at home, I only need to make small changes to my lifestyle. I spend the whole day doing meaningful things and do my dialysis at night while I sleep.”
Mr Ang Mong Lee, who is doing well on PD.

With this job that NKF helped me find, I feel useful again. It helps me to look forward to each new day.”
Madam Chia Wai Mun, a patient who benefitted from the Enhanced Patient Employment Rehabilitation Programme.

Engaging and Empowering our People

Happy and Healthy Staff = Vibrant Workplace = Better Patient Outcomes

Caring More for Patients

4,370 serving more needy patients

1,776 more patients received fist subsidies and they are paying $50 for their dialysis treatment
